 📄 github.com/mehrdad3301

## Research Interests

- Deep Learning
- Trustworthy Machine Learning
- Graph Representation Learning
- Large Language Models
- Bioinformatics
- Database Systems

## Education

**Amirkabir University of Technology (Tehran Polytechnique)** 2020 - Present  
 BS in Computer Science  
 GPA: 18.71 / 20

## Experience

**Sharif University Undergraduate Research Assistant** Jul 2024 - Present

I'm working on backdoor attacks under the supervision of Dr. Rohban and Dr. Soleymani. We've developed a simple multi-trigger attack that can bypass Anti-Backdoor Learning, a state-of-the-art defense. Currently, we are testing our attack against other defenses, and we hope to publish the results soon.

**Amirkabir University Undergraduate Research Assistant** Sep 2023 - Dec 2023

Studied machine learning with graphs under the supervision of Dr. Rahmati. During this time, I learned about graph neural network architectures and gained hands-on experience by implementing them in Pytorch. Furthermore, I studied knowledge graph embeddings and their applications within drug interaction networks.

**Snapp Software Engineer** Jan 2023 - Mar 2024

Snapp is the leading company in providing online taxi services with over 30 million users in Iran. As part of the Routing team, we were responsible for providing estimated time of arrival (ETA) and navigation services.

- Added a post-processing procedure to the map matching algorithm, which significantly improved coverage.
- Integrated traffic speeds into routing algorithms, enabling time-dependent routing.
- Redesigned ETA benchmarking service leveraging concurrency, which increased throughput by x10.

## Honors & Awards

Ranked among **top 3** students between 70 students who began their studies in Sep. 2020 at Amirkabir University of Technology, Dept. of Comp. Sci. and consequently recognized as an **outstanding** student. Feb 2022

Eligible to choose a **second major** due to outstanding performance. Feb 2021

Ranked among the **top 2%** between all applicants in the University Entrance Nationwide Exam known as Konkur (approximately 150,000 applicants). Sep 2020

## Teaching Experience

**Computational Geometry**, Dr. Rahmati Fall 2024  
**Numerical Linear Algebra**, Dr. Dehghan Fall 2024  
**Fundamentals of Programming**, Dr. Rahmati Fall 2023  
**Algorithm Design & Analysis**, Dr. Seyed javadi Fall 2022  
**Fundamentals of Programming**, Dr. Salari Fall 2021

## Selected Projects

**JNotes** [link](#)   
 Implementation of a diverse array of deep learning algorithms in Pytorch, Including GAN, VAE, DDPM, LSTM, and GPT architectures, along with applications of CLIP, DINO, and StableDiffusion.

## Evolucopter

[link](#) 

An evolutionary agent that masters a simplistic helicopter game using genetic algorithms and neural network.

## Diffnet

[link](#) 

A tiny neural network framework that works with reverse mode automatic differentiation.

## Xv6

[link](#) 

A fork of xv6 operating system that supports copy-on-write and lazy page allocation.

## Coyote

[link](#) 

A routing engine that uses Dijkstra, A\*, and ATL algorithms to compute the shortest path on a road network.

## Camel

[link](#) 

An interpreted programming language that supports arrays, dictionaries, functions, and closures.

## Fuzzy Linear Algebra *report for numerical linear algebra course*

[link](#) 

Used Sympy to solve fuzzy linear systems with Gaussian and Jacobian iterative methods

## Bounds for Pancake Problem *report for graduate course in bioinformatic*

[link](#) 

Introduced sorting by subset prefix reversal problem and its theoretical bounds

## Online Courses

---

**Machine Learning Specialization**, Stanford University

**Machine Learning with Graphs**, Stanford University

**Deep Learning**, Sharif University

**Security & Privacy in Machine Learning**, Sharif University

**Intro. to Database Systems**, Carnegie Mellon University

## Technical Skills

---

- |  |   |
|--|---|
| ◦ <b>Languages</b> Python, Go, Java, C   | ◦ <b>Database</b> Postgresql, Redis     |
| ◦ <b>AI</b> PyTorch, PyTorch Geometric, Jax, Hugging-Face, Numpy, Pandas, Matplotlib | ◦ <b>Cloud/MLOps</b> Docker, Kubernetes |
|  | ◦ <b>Tools</b> Git, Vim                 |

## Languages

---

- **Farsi** native
- **English** Full Proficiency, TOEFL iBT 111(reading 28, listening 28, speaking 27, writing 28)
